# From Your General Manager

Dear Mimosa Hills Members,

Golf season is officially underway at Mimosa Hills Golf Club, this brings excitement, energy, and numerous events to the Club. Member Tournaments and events, Corporate Tournaments, such as the recent UNC Health Blue Ridge Pro-Am, and the prestigious Carolina's Golf Association's Senior Amateur Four Ball Tournament, as well as the upcoming weddings that we are hosting. Our Food and Beverage management and staff is growing as well as learning the unique and challenging requirements of a Private Club's dining experience under the guidance of Food and Beverage Director Tom Schmitt.

To retain the momentum and participation in membership growth and the positive direction of Mimosa Hills Golf Club, the Board of Governors has approved the following, effective May 1:

- Please be looking for our upcoming e-mail introducing and inviting our members to join Clubster, our upcoming enhancement to member communication via the user friendly Clubster App!

- A Membership referral Incentive program. Any Member who refers a new Board approved Member to the Club will receive a dues credit on their statement equivalent to 1 month's dues of the new member's membership category. Referring member's name MUST be listed on the original application at the time the application is submitted to the Club.

- Implementation of a \$250.00 initiation fee for new Social Members.

- Alcohol Purchases will no longer be applied to a member's food minimum.

We have been fielding many questions regarding the Non-Resident food minimum. The nonresident food minimum is \$360.00 for a calendar year (prorated to \$270.00 for 2024). All food purchased in the calendar year will apply towards the \$360.00 minimum, if a non-resident member spends less than the \$360.00 in the 12-month period, they will be billed the difference on their January statement.

We look forward to seeing you at the Club!

Steve Harbison

Friday Night Seafood

Trivia Night 3rd Monday of Each month

Creating new Thursday night events

Month end Sunday Brunch on last Sunday of each month

Golf and Dining Packages

We continue to look for new ideas for our membership

The sun will not set on us.

# From Your GOLF COURSE SUPERINTENDENT

May-June 2024 Newsletter – Golf Course – Dan Winters, GCS

March brought 6.3 degrees above historical average temperatures and 6 inches of rain. April through the 22nd also has 6 degrees above normal, but only 1.8” of rain. The warm weather with rain and limited late frost has allowed the bermudagrass to green up nicely. I know everyone is ready to get on real grass for the driving range tee. But please keep in mind that before the artificial turf run there was absolutely nothing left of the tee after a long fall /winter/ spring of divots. The program works and we get many compliments from guest play about the end result. Overseeding with ryegrass is not an option. That process includes closing for 3 weeks to establish seed in early fall, then it is virtually impossible to get the seed to germinate in the cold weather hoping to fill in the divots. Then the ryegrass chokes out the bermudagrass come springtime due to over competition. It's a lot of expense and disturbance for in essence an 'aesthetic thing'.

The bentgrass roots are at their best this time of year because they have had fall, winter and spring to recover from the summer decline. I would argue that the greens are quicker in mid to late fall due to lower humidity and reduced growth from cold snaps. In the spring the grass gets a surge of growth (waking up) and higher humidity will create a sort of stickiness. Sometimes you hear that comment on television for the PGA Tour events about the greens being a little sticky. Of course, those speeds are at another level. The week of May 6 will be green's aerification week. We will pull cores and heavy topdress as well as some light verticutting. We try to have 9 holes each day M-W. On Thursday, May 9 will be the 'Dryject' sand injection process. The golf course will be closed all day. The entire week long tasks are to reduce organic matter content (a lab measures every year) by removing cores and diluting the profile with sand. Weather can alter our plans so please look for e-blasts or check with the pro shop for updated information. Please allow 2 weeks for the greens to recover.

We will fertilize the entire golf course the week of May 13. Every attempt will be made to keep the rough more playable this summer. As well, a 6' fairway collar will be maintained. We have a set of new fairway mower reels on order for the 2 mowers. Also, 2 new tractor blowers have been ordered and should arrive in June/July.

# Welcome NEW MEMBERS
